Xviewer (701992)

Xviewer is a PC software application designed to work with the DL series digital oscilloscopes and the DL750 series ScopeCorders. Xviewer allows you to display DL-acquired waveform data (using the "Viewer" function), perform file transfers, and control DL series instruments remotely.

You can download a trial version of Xviewer from YOKOGAWA's web site at:
<http://www.yokogawa.co.jp/tm/Bu/701992/>

USB Compliance Test Solution

A DL9240 or DL9240L together with the USB test fixture, test software and probes, allow you to test a USB device, host or hub for compliance to USB-IF specifications. The test software shows connection methods and test procedures in a wizard form for each test item. It shows connections, settings and operations necessary for carrying out each test enabling even first-time users to perform test easily. You can output waveform data from a test result window to analyze failed signals using the Xviewer waveform analysis software.
