

RESISTIVITY INDICATOR

TI 401

Ultra wide range, battery operated and portable instrument for measuring Surface resistivity of virtually any flat surface conforming to ASTM D-257 standard by using recommended parallel bar sensing probe.

The surface resistivity is conveniently indicated by a row of leds covering a total of 10 decades from 10^3 to 10^{12} ohms per square.

Ref : 61-100-0401

Power Voltage	DC 9V
Validity of battery	40 H
Measurement accuracy	$\pm 1/2$ decade
Measurement range	$10^3 \sim 10^{12} \Omega$ 40 ~ 60°C 0 ~ 100% RH
Weight of instrument	170 g
