

## **ZERO-UP** 200W/400W/800W Programmable DC Power Supplies

# Built-in RS232 & RS485 Interface with GPIB optional.

- Constant Voltage/Constant Current
- Built-in RS232 & RS485 Interface
- An embedded Microprocessor controller
- Digital Encoder Knob
- Software Calibration
- Last Setting Memory
- Parallel Operation (Master/Slave) Active Current Sharing
- External Voltage or Resistance Programming
- Voltage up to 120V, Current up to 132A
- Active Power Factor Correction: 99%
- 85~265Vac Universal Input Voltage
- 19" Rack Mounted ATE and OEM
- Worldwide Safety Agency Approvals
- CE Mark for LVD and EMC Regulation

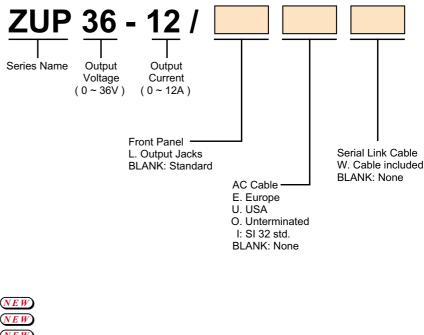

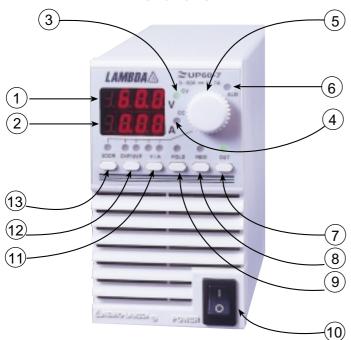

#### **Product Line Up**

### **Power Supply Identification / Accessories**

- 1. Digital Voltmeter
- 2. Digital Amperemeter
- 3. Constant Voltage Mode Indicator
- 4. Constant Current Mode Indicator
- 5. Voltage/Current, OVP/UVP, Address Adjust
- 6. Alarm (OVP, OTP, FOLD)
- 7. Output ON/OFF Control
- 8. Local/Remote Select
- 9. Foldback Protection Control
- 10. AC Power Switch
- 11. Voltage/Current Mode Control
- 12. Overvoltage/Undervoltage Setting
- 13. Address Setting

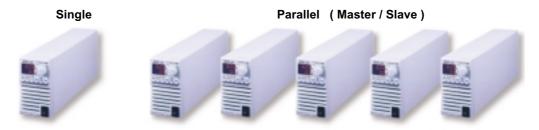

- 1. IEC320 AC Input Connectors
- 2. Remote IN Programming via RS232/485
- Remote OUT Via RS485 Communications Chaining Power Supplies to Serial Communication Bus.
- 4. External Analog Programing Control Connector
- Output Bus Bars (6V to 60V) model shown.80V to 120V models PHOENIX: PSC Plug Connectors
- 6. Ground Thread

## **ZUP Configurations**

#### **BENCH TOP POWER SUPPLY**

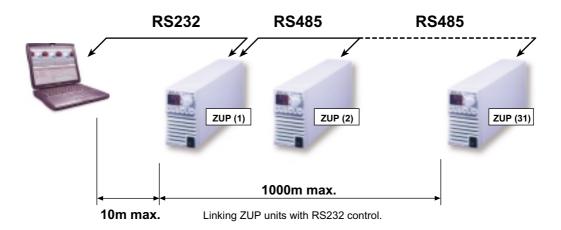

#### **PARALLEL OPERATION**

Master - Slave method: Active current sharing up to 5 units.

#### **REMOTE PROGRAMMING VIA RS232**

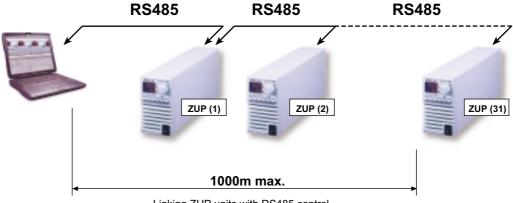

Up to 31 ZUP units can be controlled via RS232 interface.

### **REMOTE PROGRAMMING VIA RS485**

Up to 31 ZUP units can be controlled via RS485 interface.

For operation environments that require high noise immunity or long distance communication, it is recommended to use the built-in RS485 interface.

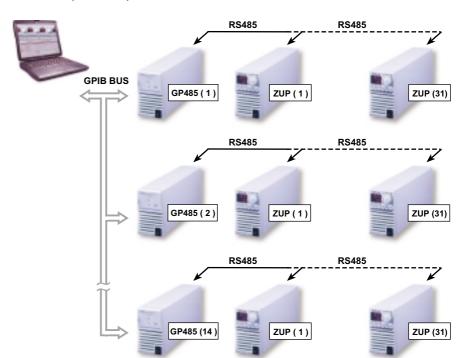

### Remote Programming Via GPIB.

#### GPIB⇔RS485 CONTROLLER

The GP485 is a high performance serial to GPIB Interface It enables a ZUP series with RS485 port to be a Talker, Listener, or controller on the GPIB

- \* Controls up to 31 ZUP units through a single GPIB address.
- \* Conforms to all versions of the IEEE488 standard, including IEEE488.2.
- \* 19 racking possibility.
- \* Application software LabView, LabWindows.

## Rack Mounted ATE and OEM up to 2.4KW

Six units can be assembled into 19-inch rack / 3U high to meet your configuration requirements

#### **Power Modules Table**

Module Type	200W	400W	800W
0 ~ 6V	33A	66A	132A
0 ~ 10V	20A	40A	80A
0 ~ 20V	10A	20A	40A
0 ~ 36V	6A	12A	24A
0 ~ 60V	3.5A	7A	14A
0 ~ 80V	2.5A	5A	
0 ~ 120V	1.8A	3.6A	
19"rack width	1 / 6 width	1 / 6 width	2 / 6 width

#### NOTES:

- \*1. Minimum voltage is guaranteed to maximum 0.2% of the rated output voltage.
- \*2. Minimum current is guaranteed to maximum 0.4% of the rated output current.
- \*3. Time for recovery to within +/-50mV against current change of 50% to 100%.
- $^{\star}4.\;$  From zero volts to full scale , resistive load and current setting at maximum.
- \*5. From no load to full load , constant input voltage.
- \*6. From 85~132Vac or 170~265Vac constant load.
- \*7. At cold start Ta=25 ...C.

- \*8. Change in output over 8 hour interval constant line, load and ambient temperature following 30-minutes warm-up.
- \*9. Given for control of the output via the serial communication or via front panel controls.
- \*10. Inverter shut down method, manual reset (OVP will shut down output)
- \*11. For cases where conformance to various safety specs. (UL, IEC, etc.) are required, to be described as 100-240VAC (50/60Hz) on name plate.
- \*12. At 100V/200V and Maximum Output Power.

#### **GP485 SPECIFICATIONS**

The GP485 has all the software and logic required to implement the physical and electrical Specifications of the IEEE488 and RS485 standards

Input Voltage /freq	Vac	85 ~ 265Vac continuous 47 ~ 63 Hz
Input consuption	W	5W
IEEE 488 Capability		SH1,AH1,T6,TE0,L4,LE0,SR1,RL0,PP1,DC1,DT0,C0,E1,E2
Indication LED's		Power /Ready ,Talk ,Listen ,SRQ
Baud rate	bps	Optional 300, 600, 1200, 2400, 4800, 9600 Default :9600
Address		1 up to 30 can be set using an address switch
Operating temp	°C	0~ 50
Storage temp	°C	-20 ~ 70
Conducted emission		EN5022B,FCC-B
Radiated emission		EN5022A,FCC-A
Safety standards		UL3111-1, EN61010-1
EMC standards		EN61326-1, IEC 61326-1, FCC part 15 (class A).
Withstand voltage		Input - Chassis 2.0kVAC 1min, Input - Output 3.0kVac 1 min, Output - Chassis 500VAC 1 min.
Vibration	G	10-55Hz, Amplitude (sweep 1 min ) 2G, X, Y, Z, When mounted with mounting screws.
Size (WxHxD)	mm	70x124x350 (GP 485 has all the mechanical specifications & mounting hole as ZUP200W/400W units)
Weight	Kg	1.95

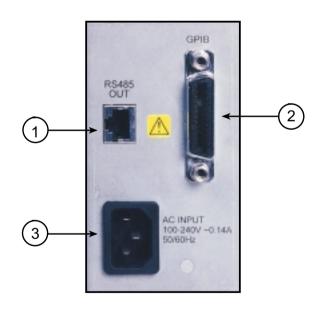

#### **Front Panel**

#### Power/Ready: Indicates that the power is ON and the self-test has passed successfully. The unit is ready to operate once the LED illuminates.

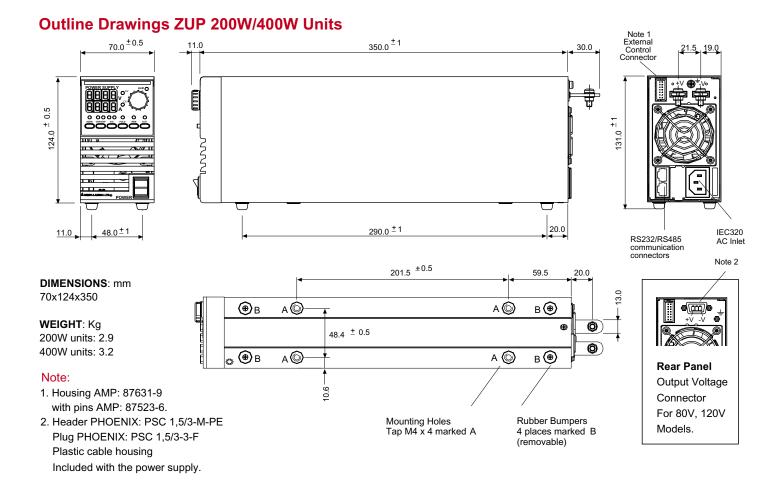

- 2. Talk: Indicates that the GP485 is addressed as a GPIB Talker.
- 3. Listen: Indicates that the GP485 is addressed as a GPIB Listener.
- 4. SRQ: Indicates that the GP485 signal line SRQ is asserted.
- 5. AC ON/OFF: Turns AC power On and Off.

#### **Rear Panel**

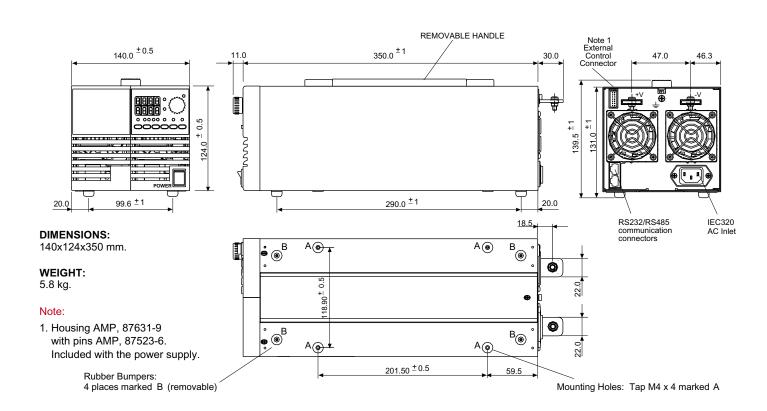

- RS485 OUT: EIA-568A shielded type connector, used for RS485 communication with ZUP power supplies.
- 2. GPIB: Shielded 24-pin Champ female connector, with metric screwlock. Used for GPIB communication with the GPIB controller.
- 3. AC Input: IEC type appliance inlet.
- 4. XXXXXXXXXXXX

## **Outline Drawings ZUP 800W Unit**

#### **Accessories**

#### 1. AC Cord Sets

Three optional cords are possible according to order:

Region	AC Cord	Power Supply Connector	Wall Plug	P/N
North America	15A / 125Vac L=2m	IEC320-C13	NEMA 5-15P	ZUP/U
Europe	10A / 250Vac L=2m	IEC320-C13	INT'L 7/ VII	ZUP/E
SI- 32 Std	10A / 250Vac L=2m	IEC320-C13	SI-32	ZUP/I

Europe

SI-32 Standard

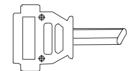

#### 2. Communication Cable

RS232/RS485 cable is used to connect the power supply to the PC controller

Mode	PC connector	Communication cable	Power Supply Connector	P/N
RS232	DB-9	Shield Ground , L=1m	EIA / TIA-568A (RJ-45)	ZUP/NC401
RS232	DB-25	Shield Ground , L=1m	EIA / TIA-568A (RJ-45)	ZUP/NC403
RS485	DB-9	Shield Ground , L=1m	EIA / TIA-568A (RJ-45)	ZUP/NC402
RS485	DB-25	Shield Ground , L=1m	EIA / TIA-568A (RJ-45)	ZUP/NC404

DB-25 (female connector)

EIA/TIA (RJ-45)

#### 3. ZUP serial link cable

Used to chain Power Supply to Power Supply from a serial communication bus

Mode	Communication cable	Power Supply Connector Remote IN /OUT	P/N
RS485	Shield Ground , L=50cm	EIA /TIA -568 A (RJ-45)	ZUP/ W

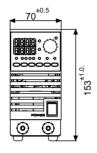

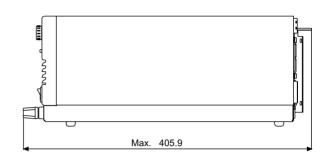

## Options ( 200W, 400W, 800W Models )

## 1. FRONT PANEL OUTPUT JACKS P/N: ZUP / L

Outline Drawing: Physical Dimensions in mm. ZUP 200W/400W Units: 70x153x405.9 ZUP 800W Units: 140x153x405.9

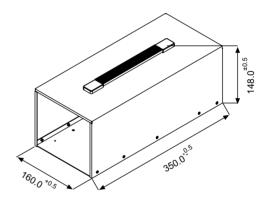

Up to 20A output current via front panel jacks.

#### 2. ZUP ASSEMBLIES

Dual Output Packing 200W/400W models

P/N: NL200

#### 3. 19" RACK MOUNTED ATE AND OEM UP TO 2.4 KW

Up to six power units can be assembled into a 19, 3U rack, kit P/N NL100.

In cases where the entire rack is not occupied with power units, NL101 blank panels can be installed.

P/N: NL100
